

Lodi Storm Drain Detectives Celebrate 30th Anniversary of the Clean Water Act!

Mural in a local Lodi school constructed by the students in honor of the 30th Anniversary of the Clean Water Act. The Storm Drain Detectives of Lodi, local students and their teachers, have completed years of extensive water quality testing along the Mokelumne River in Lodi. Some of the high school level students presented the results – tracking & analyzing urban runoff river pollutants – at the first high school Watershed Symposium held in Antelope (a smaller community north of Sacramento) May 10, 2003.
